

Hydroxyproline Assay Kit

- quantitative measurement of hydroxyproline
- colorimetric read-out at 570 nm
- easy and fast
- sensitive
- can be used for collagen analysis in all types of tissues

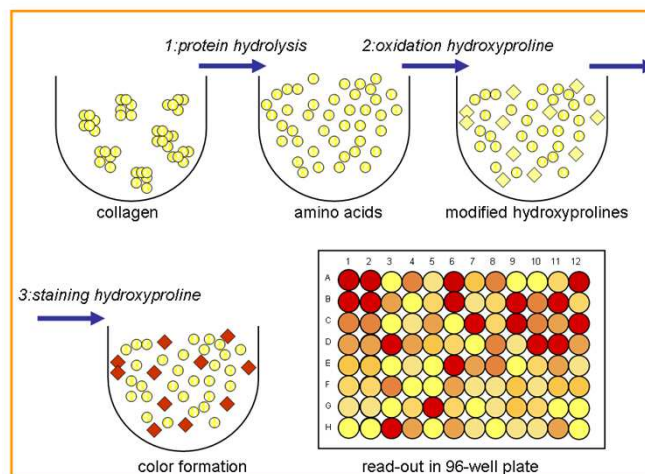

Assay specifications

- Dynamic range:** 6-300 μM
Sensitivity: 2.4 μM
Sample volume: 5 - 35 μl
Format: 96 - well plate
Intended use: very broad application:
conditioned media
cells / cell extracts
tissues / tissue extracts
species independent
collagen type independent

Quantitative measurement

Assay principle

What's in the box?

Standards, buffers and plates are included.
microtiter plate, hydroxyproline standard, assay buffer, detection reagent, plate seal.
HCl is not included.

Related assays

- Soluble collagen assay
- Total collagen assay
- Human and mouse MMP-9 activity assay
- Human and mouse MMP-2 activity assay
